- Web Accessibility
- Software Accessibility
- Hardware Accessibility
- InFocus Training
- JAWS Training
- Acrobat Accessibility
- Office Suite Accessibility
- Java Accessibility
- Windows Accessibility
- Flash Accessibility
- Federal Sales Training

JAVA ACCESSIBILITY TRAINING

Java Accessibility Training teaches software development departments to create accessible applications using the Java programming language. There are several aspects of developing applications in Java that present unique accessibility challenges, including implementation of the Java Access Bridge and Java Accessibility API. Java Accessibility Training translates SSB Technologies' first-hand experience creating accessible Java applications into easy to understand and straightforward guidance for your organization's development team. The training includes:

- Review of applicable accessibility standards, including Section 508, Disability Discrimination Act, and other country-specific requirements.
- Design principles for creating accessible Java applications.
- Successful implementation of the Java Accessibility API.
- Analysis of interactions between the Java Access Bridge and Assistive Technology.
- Code-level examples of how to comply with relevant requirements.
- Review of common errors found within Java applications.
- Solutions to known issues in your organization's applications.

TRAINING BENEFITS

SSB Training is a critical component of a comprehensive accessibility initiative. Training provides:

- Expert advice to reduce the time necessary to implement accessibility enhancements.
- Easy-to-understand instruction that provides your organization with the implementation knowledge required to achieve accessibility.
- Customized course content that enables developers to identify and address known problems in your organization's Information Technology (IT) systems.
- Integration of accessibility into ongoing development processes in order to avoid costly retrofitting projects.

TRAINING METHODOLOGY

Developed by working with over 400 customers on more than 600 client projects, SSB training courses include the following features:

- Instruction by Accessibility Experts tailored to your organization's needs.
- Training manual for future reference.
- Onsite or online course delivery, in half-day and full-day increments.
- Customization to incorporate material specific to your organization, such as known accessibility problems and participants' experience levels.
- Integration of training with other SSB products and services to facilitate your organization's overall accessibility initiative.

WHO ATTENDS TRAINING?

Java Accessibility Training is targeted towards developers, project managers, and QA engineers seeking to create and maintain Java applications that are accessible to people with disabilities and compliant with accessibility requirements.

WHERE DOES TRAINING FIT IN THE PROCESS?

Training is part of the Address phase of SSB's Assess, Address, Assure accessibility solution. Before implementing enhancements, SSB training provides your organization with the necessary tools to manage and implement an effective accessibility initiative. Training also enables your organization to derive maximum value from other SSB products and services

ABOUT SSB TECHNOLOGIES

SSB Technologies provides solutions that resolve the revenue loss, punitive damages, and compliance risks created by inaccessible Information Technology (IT) systems, including Web sites, Web applications, software, and hardware. SSB's proven Assess, Address, Assure™ solution integrates the business and technical requirements necessary to transform accessibility from a liability into a competitive advantage. With over 400 public and private sector customers, 600 successfully completed projects, and award-winning software, SSB has the experience and expertise to ensure that your organization reaches its accessibility goals.
