- Web Accessibility
- Software Accessibility
- Hardware Accessibility
- InFocus Training
- JAWS Training
- Acrobat Accessibility
- Office Suite Accessibility
- Java Accessibility
- Windows Accessibility
- Flash Accessibility
- Federal Sales Training

## WINDOWS ACCESSIBILITY TRAINING

Windows Accessibility Training teaches development teams to create accessible software applications based on the Windows platform, including applications written in C, C++, C#, and on the .Net platform. The training emphasizes practical guidance on meeting relevant accessibility standards and includes information tailored to known problems in your organization's applications. Windows Accessibility Training translates SSB Technologies' first-hand experience making applications accessible into easy to understand and straightforward guidance for your organization's development teams. The training covers:

- Review of applicable accessibility standards, including Section 508, Disability Discrimination Act, and other relevant country-specific requirements.
- Design principles for making software applications accessible.
- Analysis of common and complex errors found within software applications.
- Implementation of the Microsoft Active Accessibility API.
- Code-level examples of how to comply with relevant requirements.
- Solutions to known issues in your organization's applications.
- Integrating accessibility into ongoing software development processes.

## TRAINING BENEFITS

SSB Training is a critical component of a comprehensive accessibility initiative. Training provides:

- Expert advice to reduce the time necessary to implement accessibility enhancements.
- Easy-to-understand instruction that provides your organization with the implementation knowledge required to achieve accessibility.
- Customized course content that enables developers to identify and address known problems in your organization's Information Technology (IT) systems.
- Integration of accessibility into ongoing development processes in order to avoid costly retrofitting projects.

## TRAINING METHODOLOGY

Developed by working with over 400 customers on more than 600 projects, SSB training courses include the following features:

- Instruction by Accessibility Experts tailored to your organization's needs.
- Training manual for future reference.
- Onsite or online course delivery, in half-day and full-day increments.
- Customization to incorporate material specific to your organization, such as known accessibility problems and participants' experience levels.
- Integration of training with other SSB products and services to facilitate your organization's overall accessibility initiative.

## WHO ATTENDS TRAINING?

Windows Accessibility Training is targeted towards developers, project managers, and QA engineers seeking to create and maintain Windows-based software applications that are accessible to people with disabilities and compliant with accessibility requirements.

## WHERE DOES TRAINING FIT IN THE PROCESS?

Training is part of the Address phase of SSB's Assess, Address, Assure accessibility solution. Before implementing enhancements, SSB training provides your organization with the necessary tools to manage and implement an effective accessibility initiative. Training also enables your organization to derive maximum value from other SSB products and services.

## ABOUT SSB TECHNOLOGIES

SSB Technologies provides solutions that resolve the revenue loss, punitive damages, and compliance risks created by inaccessible Information Technology (IT) systems, including Web sites, Web applications, software, and hardware. SSB's proven Assess, Address, Assure™ solution integrates the business and technical requirements necessary to transform accessibility from a liability into a competitive advantage. With over 400 public and private sector customers, 600 successfully completed projects, and award-winning software, SSB has the experience and expertise to ensure that your organization reaches its accessibility goals.
